Pressure Sensor Array Sensor kit :

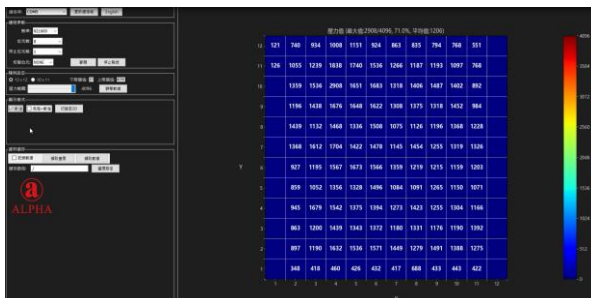

Pressure Sensor Arrays, also known as Matrix sensors, are designed to capture and analyze pressure distribution across a surface. It's useful in applications where understanding pressure patterns is critical. In order to ensure usability for a wider audience, Taiwan Alpha has developed a user-friendly sensor kit accompanied by software for simple reading and recording.

The sensor kit includes different modes, 2D, 3D and Digital Output.

2D Mode:

Captures pressure distribution in two dimensions, providing a detailed analysis of surface pressure patterns.

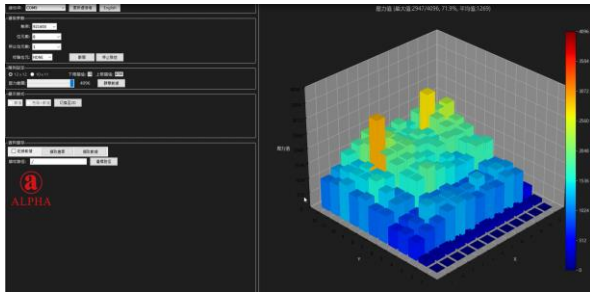

Digital Output Mode:

Provides a digital representation of the pressure data, facilitating easy integration with digital systems and processors.
